Product Features

DuPont™ Cyrel® FAST 3000 TD is a plate making system that uses dry, thermal technology to process high quality photopolymer plates, thus eliminating all solvents and aqueous solutions from the plate room.

The Cyrel® FAST 3000 TD enables the production of finished plates up to a format of 52" x 80" (1,320 x 2,032 mm). With the thermal process Cyrel® FAST system you can image and process a plate in less than one hour, making it the ideal just-in-time plate making system for the demanding packaging market.

The Cyrel® FAST 3000 TD delivers outstanding plate quality and uniformity. Next generation thermal processing plate handling technology ensures optimum clean-out and outstanding dimensional stability. The Cyrel® FAST system is environmentally friendly, with no solvents to handle, store or recycle and no plate drying equipment is required. In addition, the new design saves space and requires no expensive plate room construction.

By combining the efficiency and speed of digital plate imaging with the productivity and environmental benefits of dry, thermal plate processing, Cyrel® FAST systems allow true, just-in-time plate making to satisfy the last minute needs of even your most demanding customer.

The digital plates for DuPont's thermal plate making process are designed to meet the needs of high quality plates with fine halftone, line-work and solids.
