- Top Lift design
- Double sided exposure
- Pre-heated back exposure lamps
- 360° plate access
- Optimum productivity

Product Features

DuPont™ Cyrel® 3000 ETL-i exposes high quality photopolymer plates up to a maximum format of 1,320 x 2,030 mm (52" x 80").

The automatic lifting of the exposure lid allows easy and convenient 360° access to the exposure bed and photopolymer plate. This 360° access simplifies cleaning and adjusting of negatives and increases efficiency.

The main exposure is performed with 44 UV-A fluorescent tubes with built-in reflectors that are located in the top lid. The user can customise up to 20 basic exposure set ups through the touch screen control panel.

The exposure unit also features programmable back exposures. To perform the back and main exposure, it is not required to flip the photopolymer plates. The back exposure is performed with 46 UV-A fluorescent tubes with built-in reflectors that are located underneath the exposure glass plate. Unique to this equipment is the pre-heating exposure section which translates into predictable and consistent back exposures.

Two yellow control tubes are used to illuminate the exposure bed while performing inspection of the plate surface.
