

Nomex[®] can help us escape fire due to its inherent property

“We feel safe with Nomex[®].”

Bhaven Shukla, Manager OI - NR, SGS India Pvt Ltd, Vadodara

Synopsis

- We use Nomex[®] coverall in the field during inspections having the risk of fire.
- Nomex[®] helps us to escape fire due to its inherent fire-resistant property.

Challenges

We are an MNC with a presence in over 140 countries and 90,000 employees. As a world leading Inspection, Testing, Verification, and Certification organization, our inspectors are often on the field for Inspection activities which

include Oil, Gas, and Chemicals Vessel terminals that carry a high risk of fire.

Solutions

As a global leader, we want the very best protection for our workforce. We use Nomex[®] suits to protect our employees from chemical and fire hazards. These are extremely trustworthy suits and we are very satisfied with their performance.

Nomex[®] suits are also highly durable, which is important in our line of work. The inspectors feel very safe in these suits, which allows them to perform the inspection properly.
