

DuPont™ Kevlar® Essential 410 WL offers reliable and comfortable hand protection

“DuPont PPE is worth the money for its superior quality!”

Dinesh Peter, Quality Assurance Engineer, SRKP Ltd, Coimbatore

Synopsis

- Earlier, we used locally manufactured gloves that were not comfortable, offered poor heat resistance, and provided poor grip.
- **DuPont™ Kevlar® gloves ensure lesser fatigue while working, offering us higher productivity and peace of mind.**

Challenges

I am the Quality Assurance Engineer for a leading rubber parts manufacturing company. We have two manufacturing plants in South India and supply rubber automotive parts to leading Indian and global automobile companies.

Earlier, we would purchase locally manufactured gloves for our employees, which had multiple issues. They were ill-fitting and uncomfortable to wear, had poor grip, relatively low heat resistance, and would heat up in less than 5 minutes. In addition, the workers suffered from skin ailments due to improper air circulation; these factors affected employee performance and reduced productivity.

Solutions

We turned to DuPont™ Kevlar® Essential 410 WL to resolve worker problems. Employee health is vital for our organization, and the most crucial reasons for choosing Kevlar® gloves were reliability and comfort. DuPont™ Kevlar® Essential 410 WL offered us everything we were looking for in a glove. In addition, all the cut, friction, and mechanical-related hazards were reduced to a minimum after using them. We have noticed that since the gloves are softer, the workers are comfortable even when working with wet machine parts.

I am highly impressed with the reliability, protection, and durability offered by the Kevlar® Essential 410 WL gloves. I must mention that the workers who were unable to touch anything due to skin irritation have not had any trouble because the gloves have longer cuffs and are puncture resistant. We are now confident of following the highest standards of hand protection and the general well-being of workers after switching to DuPont™ Kevlar® gloves.

I feel that Kevlar® Essential 410 WL is worth the money as it has far superior quality compared to local gloves.
