Tyvek® protective apparel recycling program

DuPont™ Tyvek® is proud to expand our long standing Tyvek® Protective apparel recycling program to help our customers in Europe manage used Tyvek® and IsoClean® protective apparel and reduce wastage.

WHY RECYCLE?

DuPont™ Tyvek® is made from high-density polyethylene (HDPE). For this reason, Tyvek® can be mechanically recycled into products such as underground cable protection piping, automotive parts, blown film, packaging cores and trays and in some cases back into pure polyethylene pellets.

The Tyvek® protective apparel recycling program offers the chance to divert garments away from landfills and give them a second life in products like containers, lumber pallets and park benches.

For every case of 50 Tyvek® coveralls that is recycled, 10 kgs of Tyvek® are diverted from the waste stream and given a second life in products.

DUPONT SUSTAINABILITY COMMITMENT

Sustainability is at the core of what we do - from reducing our operational footprint and creating market-facing sustainable solutions to addressing the global challenges of the future. This program is yet another example of the DuPont commitment to sustainability. The Tyvek® protective apparel recycling program is easy to participate in and is a cost-effective and responsible choice.
