Product Features

DuPont™ Cyrel® 1000 D is capable of drying high quality photopolymer plates up to a format of 914 x 1,194 mm (36" x 47"). The unit is easy to install, easy to support and maintain, simple to operate, and extremely reliable. Each of the six drawers are configured into three modules, which can be individually controlled through the touch screen control panel. This allows the choice of drying time for each drawer and the time countdown is performed second by second. This function allows the user to set the most appropriate drying time, depending on the type and thickness of the plate being used.

Consistent drying temperatures and airflow throughout the six separate drawers of the Cyrel® 1000 D ensures plate drying uniformity, and plate dimensional stability. The operator can open a dryer drawer to visually inspect the plate and determine its status anytime during operation. Automatic control (closed loop) between the temperature setting on the PLC and the heating elements prevents overheating in the drawer.

The Cyrel® 1000 D can be installed as a stand alone unit or may be combined with a Cyrel® 1000 LF. The Cyrel® 1000 D is delivered in one piece.
